For set of claims 58-61, none of the references of record teaches or suggests the claimed Method for creating an emitter having a cathode emission surface having the steps of creating the electron lens on the protective layer with a layer of tetraethylorthosilicate (TEOS), silicon oxides, silicon nitrides, or combinations thereof and among other steps/limitation as claimed in independent claim 58

For Set of Claims 62- 69, none of the references of record teaches or suggests the claimed Method for creating an emitter having a cathode emission surface having the steps of creating an opening between the second conductive layer and the second protective layer; etching the second protective layer to the first conductive layer; etching the first conductive and among other steps/limitation as claimed in independent claim 62
